

Certified Full Hard EN Standard Stainless Steel Sheet With Excellent Stain Resistance

Our Product Introduction

more products please visit us on stainless-steelsheetcoil.com

Basic Information

- Place of Origin: China
- Brand Name: Tai-steel
- Certification: ISO-9001
- Minimum Order Quantity: 1 ton
- Price: 1750
- Delivery Time: about 15 days
- Payment Terms: TT payment

Product Specification

- Hardness: Full Hard
- Standard: EN
- Corrosion Resistance: Strong
- Scratch Resistance: High
- Type: Steel Sheet
- Stain Resistance: Strong
- Durability: High
- Application: Construction ,Decoration, Industry
- Highlight: **EN Standard Stainless Steel Sheet,
Full Hard Stainless Steel Sheet,
Excellent Stain Resistance Stainless Steel Sheet**

Product Description

Product Description:

This product is designed to withstand harsh weather conditions and other external factors that can cause damage to other types of stainless steel. Its full hard hardness ensures that it can withstand high pressure and heavy usage, making it ideal for use in industrial, construction, and architectural projects.

The Stainless Steel Yellowing Resistant product comes in two shapes - flat plate and plate. Its thickness ranges from 0.21-0.50mm, giving you the flexibility to choose the right thickness for your specific needs. The flat plate shape is perfect for cladding, while the plate shape is ideal for use in structural applications.

This product is also colored stainless steel, which means it has a unique and attractive finish that can enhance the aesthetic appeal of any project it is used in. Its yellowing resistance ensures that it maintains its color and finish for a long time, even in harsh environments. In summary, the Stainless Steel Yellowing Resistant product is a high-quality stainless steel product that offers durability, rust resistance, and hardness. Made from 300 series stainless steel, specifically 304 stainless steel, it is designed to withstand harsh weather conditions and heavy usage. It comes in two shapes - flat plate and plate - and has a thickness range of 0.21-0.50mm. Its colored stainless steel finish and yellowing resistance make it perfect for use in a wide range of architectural, construction, and industrial projects.

Features:

Product Name: Stainless Steel Yellowing Resistant

Durability: High

Thickness: 0.21-0.50mm

Application: Construction, Decoration, Industry

Corrosion Resistance: Strong

Standard: EN

Material: Decorative Stainless Steel

Type: Corrosion Resisting Alloy

Applications:

Tai-steel is made of 304 stainless steel, which is known for its strong stain resistance and high temperature resistance. This makes it a suitable material for various applications in construction, decoration, and industry. The product is also EN standard, which is a testament to its quality.

The stainless steel used in Tai-steel is corrosion-resistant, making it an ideal material for outdoor use. It is also yellowing-resistant, ensuring that it maintains its appearance over time. The product is available in antique stainless steel, which is perfect for adding a vintage touch to any project.

Automotive stainless steel is another application of Tai-steel. Its strong resistance to corrosion and temperature makes it a suitable material for car parts that are exposed to the elements. The product is also easy to maintain, ensuring that it remains in good condition for many years.

In conclusion, Tai-steel is a high-quality stainless steel product that is suitable for various applications in construction, decoration, and industry. Its strong stain resistance, high temperature resistance, and corrosion resistance make it a reliable choice for outdoor use. With its antique and automotive stainless steel options, Tai-steel provides versatility in design.

Customization:

Support and Services:

The Stainless Steel Yellowing Resistant product is designed to maintain the appearance of stainless steel surfaces over time. It provides a protective coating that prevents yellowing caused by oxidation and exposure to sunlight. Our technical support team is available to provide assistance with product selection, application techniques, and maintenance recommendations. In addition, we offer a range of services to help our customers achieve the best results, including on-site consultations, customized application plans, and training programs. Our goal is to ensure that our customers are satisfied with their purchase and have the knowledge and resources needed to maintain the appearance of their stainless steel surfaces for years to come.
